

Garden Club Meeting

The Northfield Garden Club held its regular monthly meeting, last Monday night, in the lovely garden of Mrs. Martin Vorce. The meeting, which was the first of a series of informal out-door gatherings planned for the summer, was well attended. The members brought their own lunches, and hot coffee, strawberries, and cream were on sale.

After supper, and the short business session, the gardens of Mrs. Morgan, Mrs. Merrill, Mr. Field and Mrs. Bigelow were visited. These visits were not alone pleasant, but interesting and instructive as well.

Who can set a value on gardens such as these. Gardens laid out and tended by their owners, and where each individual plant takes on a special significance and personality. Anyone with money and the aid of a landscape gardener, can plant a garden, but the real New England gardens are not made that way. Plant by plant, they grow from small beginnings. Each year of growth marked by failures and triumphs, until as the years go by, the garden becomes a treasure-house of memories and associations.

Here is the Lilac that little Billy loved and that his chubby fingers helped to plant. Billy went away a long time ago, but the lilac lives on. Helen gave this rose the year she was married. Now her children wrinkle their noses to catch its fragrance and prick their fingers on its thorns. This peony came from mother's garden. It has no name, but it is priceless. There is rarely a New England garden, that does not have treasures such as these. Perhaps, in the beginning, they were only plants, but as the years have gone by, the associations of a lifetime have clustered around it, until the garden has become a secret shrine. So let us plant, not just for to-day, but for the years to come, that our gardens may become a very real part of our lives. Let us make our houses, homes, not mere transient camps.

Ford Prices Reduced

Detroit, Mich., June 16—Reductions of \$10. to \$15. in list prices of 1934 Ford V-8 passenger cars and \$10. to \$20. in list prices of Ford V-8 commercial cars and trucks were announced last week by the Ford Motor Company effective Friday, June 15.

Ford prices had remained unchanged since the introduction of the 1934 Ford V-8 last December, the Ford Motor Company not having participated in the recent general automotive price increase. The reductions announced are, therefore, a decrease in the original prices.

The price reduction on the standard and de luxe Tudor Sedan, most popular individual models in point of sales, is \$15. Prices of other standard and de luxe body types were reduced \$10, except Cabriolet, de luxe type, which remain unchanged. Both standard and de luxe passenger cars have the same V-8 engine and 112-inch wheelbase chassis. Body types for both are identical except for the de luxe equipment.

A damp, clean sponge is better than a brush to take list off broadcloth.

The following poem was composed by Josephine Oakes of the sixth grade.

A Storm  
The clouds are very angry;  
The rain is falling fast;  
The little flower lifts her head  
For she is fresh at last.

The ground is very wet;  
The gardens are fresh green;  
The rubbers go splash-splash,  
And gay umbrellas are seen.

## EDITORIAL

### OUR CONFERENCES

Fifty-four years ago this summer the first Northfield Conference was held. More than 300 people responded to Mr. D. L. Moody's call which he described as a "Convocation for Prayer." There was no Auditorium, no "Ridge," only one dormitory on the Seminary campus and that was not large enough to accommodate the unexpected number who responded to Mr. Moody's call. There were not enough "spare rooms" in town to take care of the overflow and many of the guests had to sleep in tents. There was no meeting place in town large enough so a huge tent was pitched behind Mr. Moody's house.

Thus the conference gave Northfield its first experience in large scale entertaining and through the years the conference has been not only a world wide spiritual center but the financial backbone of Northfield's summer prosperity.

Let's get behind the conferences. Attend the meetings. Tell your out-of-town friends about them. Remember the dates. Here they are in case you want to "paste them in your hat."

### Summer Sales

#### Meeting Planned

Consumer Contacts  
To Be Featured

The carnival spirit, so typical of summer, will be used in a great Norge sales drive during July and August, plans for which will be announced by factory executives at a dealer meeting sponsored by The B. H. Spinney Company, Norge distributors for this territory, to be held at the Kimball Hotel, Springfield, Mass., on Friday, June 15th, and to which all appliance dealers are invited, according to Mr. B. H. Spinney of the distributing company.

"Some refrigeration dealers seem always to expect a summer sales slump, for which there is no evident excuse," said Mr. Spinney. "Analysis of monthly volume shows that sales during July and August are 14 per cent above the yearly normal. In the past four years, the yearly share represented by these two months has increased from 13 to 19 per cent, showing that the industry has eliminated its old-time lull. The Norge Corporation, accustomed to smashing traditions, expects to climb to new peaks of public patronage this summer. It feels it has a greater obligation of public service during the hot summer months when, of all periods, the average family most needs and appreciates the convenience, protection and savings of Rollator Refrigeration. "Factory officials are bringing stage trappings, a dramatic program and complete dealer instructions covering all phases of this summer sales drive in which, among other features, we will announce two great consumer contests for valuable prizes in a heavy advertising campaign, soon to break. We expect to have the largest and most enthusiastic dealer meeting of our history."

"A surprise model of an entirely new Norge, in a spectacular finish, will be exhibited, of which a limited edition will be available for display during July and August."

"Along with Rollator refrigeration; the new line of Norge Washing Machines, Oil Burners and Rollator Stove will be featured in the summer sales drive. Norge sales in this territory are 146 per cent of the comparative period last year. Naturally, the Norge Corporation is enjoying such unusual popular favor that its sales for the first five months of 1934 were 80 per cent ahead of last year's entire volume, and its share of the competitive total has been doubled," Mr. Spinney concluded.

### For Our Trust

The infinite Father does not stand by us to be catched and explain himself to our vain minds. He is here for our trust; and if we will but lean on Him our chafing heart shall sleep the sweet sleep of recovery.

CONTACT WITH THE WORLD!

**LITTLE AMERICA, ANTARCTICA**  
TICA, May 31 (via Mackay Radio)—Every day I realize more and more what a wonderful scientific age we are living in. Here we are, 56 of us, living on a sheet of snow and ice with 1600 feet of water under us in total darkness, 2300 miles from the nearest human habitation, and so surrounded with ice, some of it 30 and 40 feet thick for hundreds of miles, that all the combined navies and icebreakers in the world could not reach us. And yet we have electric light and many

other luxuries and through the miracle of radio, we know pretty well what is going on in the rest of the world. Three small incidents during the past few weeks, involving Commander Noville, with whom I live in a little hut we built on the way down, made me ponder these things.

In one of the news broadcasts we are receiving we learned that his favorite baseball team, the New York Yankees, were about to open their season, which gave George a chance to radio his good wishes for a successful season full of home runs, to Col. Ruppert, owner of the team, and Babe Ruth and Lou Gehrig. This message, we understand, was delivered to the team just before the first game and while it didn't make them win it, we are happy to know they have won, at least every game since and are way out in front. Learning that his old friend, Hal Skelly, was about to open in a new play, Commander Noville sent him a message of good will on opening night and was tickled to get word that the play, "Come What May," proved a substantial success. He told me he hopes it runs until we get back and can see it. Some run! We expect to get back to Broadway in about August, 1935. Not all of our contacts with the world are so pleasant. We also hear considerable grief. Yesterday, Commander Noville got a sad tale of woe from a pal of his in New York, N. Y.

Our tunnels, where we store our food, are beginning to smell like a butcher's ice box. They are full of chopped up seals. We got about half of the 500 seals we had to kill in before darkness prevented us from working on the bay ice any longer. Now we have plenty to last us for the winter. The rest are lying out there on the ice. We'll dig them out of the snow when daylight returns in August. We needn't worry about wild animals taking them away. There are no such animals down here. Spring must be well under way up where you live by now. I'd like to see a few flowers and some birds. Well, when the weather gets too hot to please you, think of us in Little America—in the dark and 35 to 50 below zero.

We're about to publish a new lot of beautiful big 30 1/2 x 3 1/2 inch working maps of Antarctica to send to new members of the club. If you haven't joined yet, now is the time. No dues or other expenses. Membership card, map, and everything else free. Simply send self-addressed, stamped envelope, or, if you are a teacher, scout master, Legion Commander, or head of any group interested in aviation, exploration and adventure, and wish to enroll the entire organization, send names and home addresses and a 3 cent stamp for each of your members to Arthur Abele, Jr., president, Little America Aviation and Exploration Club, Hotel Lexington, 48th Street and Lexington Avenue, New York, N. Y.

## Ford Building Under Construction at New Fair

Ford contributes giant structure to 1934 Century of Progress. Shown here is a conception by Hugh Ferriss, noted New York artist, of how the Ford Exposition building, now being erected at the Chicago World's Fair, will look at night in its blaze of light, after the Fair opens May 28. The building is 600 feet long and ten stories high at its center. It faces on a five-acre park fronting on Lake Michigan. Albert Kahn of Detroit is the architect, and Walter Darwin Teague of New York, industrial designer, is in charge of interior display. Ford Park will have 10,000 seats for free concerts.

## BESIDE THE ROAD

I built a little house beside the road—  
A pretty little house, all hid in vines,  
With casement windows, paths in graceful lines,  
And rooms where peace and cheerfulness abode.

I was so pleased with it, I wrote my friend  
Who lived afar, and sent her snapshot views.  
She passed them on to others with the news—  
And now I've tourist guests without an end!

### 150 Funmakers With Huge Circus

Great Ringling Bros. and Barnum  
& Bailey Organization Presents  
Largest Number of Clowns Ever  
Assembled—800 World-Famous  
Men and Women Arenic Stars  
On Show's Thrilling 1934 Pro-  
gram

Ringling Bros. and Barnum &  
Bailey Combined Circus, truly The  
Greatest Show on Earth, making  
its grand and glorious 1934 tour  
of the continent and definitely  
scheduled to exhibit in Springfield  
Saturday, June 23 has assembled  
from the four corners of the earth  
—and points in between—the  
greatest aggregation of clowns in  
all amusement history.

One hundred and fifty interna-  
tionally-famous funmakers cavort  
and caper about the seven rings  
and stages and the huge hippo-  
drome track this year in the most  
stupendous circus presentation  
ever offered.

Clowns have always been an im-  
portant part of the circus and the  
amusement world was amazed and  
delighted when an even hundred  
of them were brought together for  
the first time by Ringling Bros.  
and Barnum & Bailey. But when  
150 of the funniest clowns imagin-  
able were placed on the same pro-  
gram in a simultaneous display  
this spring, the enthusiasm of cir-  
cus-goers knew no bounds.

The big show, however, has a  
jealously guarded reputation for  
doing the new and unheard-of and  
there is evidence of this through-  
out its gigantic new performances  
this season.

Besides the clowns, there are  
800 men and women arenic stars  
of international eminence, many  
of them touring the American  
continent for the first time.

Several of the producing clowns  
have introduced splendid ideas in-  
to this year's all new and greatly  
enlarged opening spectacle. The  
Durbars of Delhi in which more  
than 2,000 people and animals  
take part. The Durbars head a list  
of features newly assembled that  
will compel the vast 1934 program  
to be recalled with deep pleasure  
for a lifetime.

Among them is a great new con-  
gress of the world's foremost ac-  
robatic champion leapers and som-  
ersaulters presented together in  
the most amazing athletic contest  
ever witnessed and a series of  
thrilling innovations including a  
startling new sensation presented  
by the Great Hugs.

The great combined circus will  
arrive on four long trains of 100  
double - length steel railroad cars,  
bringing over 1,600 people, 50 el-  
ephants, 1,000 menagerie animals  
and 700 horses.

### YOUR AUTO INVESTMENT

Aside from their home and their  
business, an automobile represents  
the largest single investment made  
by most people.

"In spite of the fact that their  
car represents such an important  
investment to practically all driv-  
ers," said Mr. Morgan, manager of  
the Morgan Garage, "less is done  
to protect and conserve that in-  
vestment in most cases than in any  
other instance."

"An owner's investment in an  
automobile can be protected at no  
inconvenience to himself through  
our program of periodic inspec-  
tion. Under this plan the expen-  
sive results of neglected wear and  
tear can be reduced greatly by  
making the necessary adjustments,  
replacements and repairs before  
they result in conditions that are  
costly to correct."

Shipments so far in 1934 have more than doubled last year's corresponding period. Orders for the first five months were 260 per cent of those in the like period of 1933. Open orders, on May 30th, are over five times greater than on the similar date of 1933. This is the thirteenth consecutive month in which sales topped the total of the same month of the preceding year, according to Howard E. Blood, President, Norge Corporation, division of Borg-Warner Corporation.

"Norge Rollator refrigeration is enjoying remarkable public acceptance," said Blood, "as is evidenced by the fact that Norge's share of the competitive total has more than doubled so far this year, compared with 1933. We are planning a great summer sales drive to keep our factories at capacity production during the summer season. The country over, Norge dealers will join in a period of Cold Cookery Carnivals and a Friendship Campaign to acquaint the American housewife more forcibly with the convenience, use value, health protection and cold cookery delights of electric refrigeration during the summer period.

"Thirty Norge field representatives from all points in the country convened in Detroit on June first, to plan the July-August sales campaign which will be more extensively advertised and promoted than any other event in Norge history," Mr. Blood concluded.

#### Farm Mortgage Loans

Increasing During Year

Seen as Shift from Private Lenders to Co-operative Credit System

More than 13 times as much money was loaned on farm mortgages in Massachusetts through the Federal Land Bank during the first five months of 1934 as during the same period of 1933, according to a report by E. H. Thomson, general agent of the Farm Credit Administration of Springfield, (Mass.) which serves the six New England states, New York and New Jersey.

Whereas \$151,200 was loaned prior to June 1 of last year, this year to the same date the same class of loans amounted to \$977,500. In addition, \$1,006,800 was loaned through the bank as agent for the Land Bank Commissioner from a special appropriation for emergency cases in which the regular first mortgage loans were not adequate. The Emergency Farm Mortgage Act which became effective in May 1933 permitted commercial loans but few were ac-

## "I'D LIKE TO BE A BRIDE AGAIN

—if only to start with a kitchen like this!"

BANISH DRUDGERY FOREVER WITH ELECTRICITY

It's a thrill for the homemaker who visits a modern bride to see her all-electric kitchen . . . but one need not be a bride to enjoy the comfortable convenience that electricity brings.

To begin with, there's the electric range, with its many advantages of speed, economy, cleanliness, and absolute dependability—advantages that cost no more but which give much in

the way of comfort and convenience.

Nearby stands the electric refrigerator,

ever-ready to supply a

wealth of frozen desserts, salads, ice cubes—all at a cost that every family can afford. To complete the picture there's the electric dishwasher, eliminating as it does the messy job of doing dishes by hand.

YOUR kitchen can be all-electric! Plan it now for your present home, and install it as a unit, or piece by piece over a period of time. Ask

your dealer to help with your plans—he'll be glad of the

opportunity to serve you

usually closed until later in the season.

"More than 60 per cent of all farm mortgages recorded in the northeastern states between October 1, 1933 and March 31, 1934 were on loans made through the land bank," said Mr. Thomson. "This shows the high proportion of farm mortgage financing which has recently come to the land bank and represents a mass shifting of agricultural debts from private creditors to a co-operative farm credit system. The demand was stimulated as much by creditors as by debtors, since private individuals as well as banks and other lending organizations were as anxious to liquidate their claims as farmers were to have them refinanced."

During 1933 the Springfield Federal Land Bank loaned \$4,906,400 in the entire district, and a large part of this was in the last four months of the year. In the first ten weeks of 1934 loans were made at the rate of nearly \$1,000,000 a week. On March 26, the bank shifted from cash to bonds in disbursing proceeds of loans and the rate of closing dropped abruptly for a few days. "Loans are now being made at the rate of about \$700,000 a week and creditors appear as willing to accept bonds as cash," Mr. Thomson said. Bonds distributed are obligations of the Federal Farm Mortgage Corporation and are guaranteed both as to principal and interest by the United States Government.

#### ATHLETE'S FOOT

The potential disability which this disease may cause warrants its serious consideration. It is caused by a vegetable parasite of the ringworm group, and cracks or erosions in the skin caused by this disease may become avenues of entrance for pus organisms which result in septic conditions.

Warmth and moisture are factors in the disease. Prevalence is greater in the summer time, and individuals with moist feet are more frequently affected than those with dry feet. Improper or

inadequate sanitary facilities in shower baths, locker rooms, and bathhouses promote an interchange of infectious material from feet.

Individual prevention includes avoidance of contact of bare feet with floors of shower baths and locker rooms, and strict personal hygiene regarding the use of one's own towel, slippers, etc.

Rational treatment depends on various factors—whether it is the scaly type, the blister type, the soggy moist type, or the very dry type; secondly, any secondary infection; thirdly, the type of skin the individual has; fourthly, the areas of infection. Itching is a marked symptom, particularly in the blister type.

Individual treatment is essentially a matter for the physician. Routine treatment with certain remedies may be either too strenuous or inefficient. Persistence in

intermittent treatment is important even after evidence of the disease has gone in order to avoid recurrence.

Chinese—Better to be civil to the kitchen god than to the god of the inner sanctum.

Japanese—Better do one act quickly than talk about a hundred for a day.

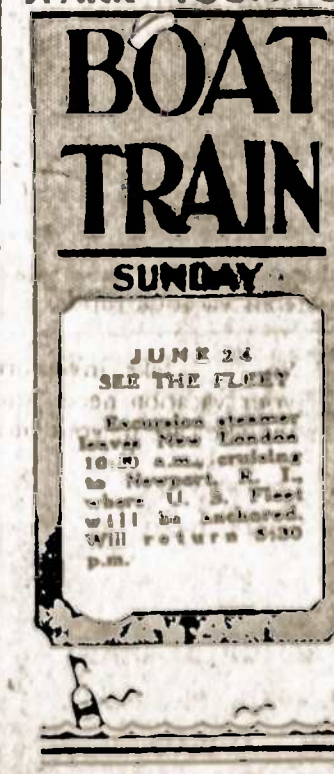

Russian—If the father is a fisherman, the children look into the water.

Italian—Who would make money must begin by spending.

French—The sign-board brings the custom.

The Library of Congress was established in 1800, destroyed by fire in 1814 and rebuilt. 1933 saw another addition to it.

### Local Bank Adopts Metered Service Charges

The Northfield National Bank  
which is a member of the Frank-  
lin - Hampshire Clearing House  
Association, with Amherst, Athol,  
Conway, Easthampton, Greenfield,  
Northampton, Northfield, Orange,  
Shelburne Falls, South Deerfield  
and Turners Falls banks as mem-  
bers, what is termed a measured  
service schedule in connection  
with accounts.

Depositors with a daily balance  
of \$400 to \$499 are entitled to is-  
sue 25 checks and withdrawal re-  
ceipts without cost; \$500 to \$599  
has the privilege of 20 checks;  
\$600 to \$299 the depositors is  
privileged to issue 15 checks, and  
for accounts from \$100 to \$199  
the number of checks to be issued  
without charge is 10.

Accounts under \$100 are to be  
subject to a \$1 monthly charge  
and the customer has the privilege  
of issuing 15 checks or withdrawal  
receipts a month.

The new system is one which  
many other banks have adopted  
because of the expense of carry-  
ing accounts which show a loss in  
handling and if an account which  
carries a \$500 or more daily bal-  
ance is shown to be a losing propo-  
sition, after analysis, then a de-  
positor would be so informed and  
the amount believed suitable for  
handling such accounts would be  
charged.

Some of the other regulations  
which have been adopted by the  
association are as follows: A min-  
imum charge of 50 cents will be  
made for each check presented  
against insufficient or uncollected  
balances; a minimum discount  
charge of \$1 will be made on each  
loan or renewal; a charge of \$1  
will be made in all instances where  
notes are liquidated at maturity;  
uniform exchange charges for  
cashing checks by non-depositors  
and fees for drafts, cashiers'  
checks or treasurer's checks have  
been adopted.

June and the world begins anew  
for me;  
Cupid and I have built a cozy  
nest  
Where love will be forever held in  
fee,  
And weary labor find sweet  
peace and rest.  
(This highbrow writing throws me  
to the mat,  
But—gee! my girl and I do like  
our flat!) A. L. Webb.

The Whipping Post has been  
used in Delaware since 1656 and

being dormant for 50 years.
